

# iFIX 3.0

## FACT SHEET

**iFIX® – one of our robust HMI/SCADA applications – has become more secure, more flexible and more powerful than ever before.** iFIX 3.0 features significant enhancements in both functionality and ease-of-use. It also includes new features designed specifically to address the electronic signature and advanced audit trail needs of the pharmaceutical industry (21 CFR Part 11), while benefiting all markets with greater security and operator accountability.

Flexible, scalable and developed to leverage open technologies – from Microsoft® platforms and applications to OPC data connectivity – iFIX 3.0 is an ideal HMI/SCADA solution to meet your needs.

For more information about iFIX and GE Fanuc's entire family of Intelligent Production Management solutions, visit us online at [www.gefanucautomation.com](http://www.gefanucautomation.com).

### Advanced Features and Functionality

- **Market-leading 21 CFR Part 11 e-signature compliance**

*Complete accountability for data and control changes – Ability to capture who did what, when, where and why*

- **New security synchronizer option**

*Configure iFIX security rights from Windows*

- **New fully customizable on-screen keyboards**

*Improved touchscreen and keyboardless operation*

- **Increased ease-of-use and reduced development efforts**

*New single dialog configuration, new picture sizing and cross reference utility, new chart group, Web browser and Dynamo builder wizards and more!*

- **Upgraded Support**

*Windows NT, 2000, and now XP support. Crystal Reports 8.5 runtime files, OPC 2.0 data connectivity, and SQL 2000*

- **Support for daylight savings and time zones from inside the scheduler application**

*Schedule events around daylight savings and different time zones*
